

C5 Malvern Quartz

OWNER'S HANDBOOK

Time on your side...

Your Christopher Ward watch has been designed and engineered by highly talented craftspeople to ensure not only accurate and precise timekeeping but also to bring a real pride of ownership that only luxury items of the highest quality can ever hope to deliver.

You have made an investment, a good one, and the aim of this handbook is to help you make the most of that investment during what I hope will be a lifetime of ownership.

A handwritten signature in black ink that reads "Chris". The letters are fluid and cursive, with a prominent loop at the start of the "C".

Christopher Ward

Caring for your Christopher Ward quartz watch

Your C5 Malvern quartz watch is constructed from the finest components and materials available including one of Switzerland's finest quartz movements.

As with all watches of this quality, with just a little care, it has the potential to become an heirloom piece giving further joy to future generations.

Here are a few hints to help keep your watch working perfectly over the years:

- Although the battery in your watch may last longer, we recommend you have it changed every 2/3 years by a reputable watch repairer.
- At the same time as having the battery changed it makes sense to have the watch repairer clean and lubricate your watch as necessary.
- Adhere to the water resistance ratings towards the end of the handbook to prevent water getting to the movement which could result in a very costly repair or the need for a replacement movement.
- Your watch is shock resistant to minor impacts but dropping from height onto a hard surface may damage the movement.

SWISS MADE

Should you need a replacement part - don't worry, we keep stocks of spare parts for years, even for discontinued models. It's all part of the Christopher Ward service.

Finally, don't forget our **CW360° Care Programme** allows you to return your watch absolutely free, for any reason, and with no quibbles, for up to 60 days after purchase and we also guarantee your movement for up to 60 months, so long as it is regularly serviced. After all, why shouldn't you enjoy peace of mind as much as you enjoy your watch?

The C5 Malvern Quartz

Features

1 jewel Swiss movement

Date indicator

Height: 10.8mm

Weight: 80g - 140g

Case: 316L Stainless steel

Calibre: Ronda 517

Accuracy: +20 / -10 seconds per month

Magnetic resistance: 18.8 Oe

Description of the display and control buttons

Setting the time/date

For a higher water resistance your crown is of the screw-in type. To get to position ①, turn the crown anti-clockwise until it releases itself.

- Pull gently into position ②. For rapid date correction, turn in a clockwise direction.
- Pull gently into position ③. This position is used for handsetting, and stopping of the second hand. For precise time setting it is recommended to pass beyond the desired minute and to set the hand backwards.
- Push the crown back into position ① until flush with the case and screw in.

Please note: Date correction should not be carried out between 20.00 hr and 02.00 hr as the watch gearing will already be aligning itself to change the date. The crown should always be screwed in after adjustment, and it is best to do so from position 3 to avoid advancing beyond the desired date.

Fitting the bracelet

If you find the bracelet needs adjusting to your wrist we recommend you have it re-sized by a reputable watch repairer or jeweller. Most local jewellers will either do this for free or perhaps make a nominal charge for what is a job that should only take a few minutes. It is always best to be present so a comfortable fit is achieved.

Establishing the length of the bracelet

Place the watch with its separated bracelet on your wrist and estimate the number of links you need to remove. If you need to remove several links, try to keep the numbers removed from both halves of the bracelet as equal as possible to ensure that the clasp remains roughly in the middle of your wrist.

To open your bracelet simply press either side of the clasp to release as shown.

The quick-release butterfly clasp

The strap versions of the C5 Malvern quartz watch use quick-release butterfly clasps. If you are unfamiliar with the butterfly clasp system just follow our 8 step guide below.

Step 1 Locate the clasp

Step 2 Click quick-release

Step 3 Pull open clasp

Step 4 Prise cover open

Step 5 Thread strap through

Step 6 Snap back

Step 7 Close clasp

Step 8 Complete

Water resistance

Please note. these are only guidelines but we strongly urge you to adhere to them to retain the integrity of your watch. If you have any queries regarding this please contact us direct.

1 ATM
(10 Metres)

Safe to wear your watch while washing your hands with tap water.

3 ATM
(30 Metres)

Washing your car and or general hosepipe usage.

5 ATM
(50 Metres)

Water resistant to most household shower units.

10 ATM
(100 Metres)

Safe to use while snorkelling in open water, it is not advisable to dive with your watch.

30 ATM
(300 Metres)

Ideal for experienced divers and, in general, anybody practising scuba-diving.

50 ATM
(500 Metres)

Professional divers, experienced prolonged exposure underwater.

NB. To safeguard watch movement please ensure the crown is, at all times, secured correctly.

Keeping in touch with Christopher Ward...

From small beginnings just a few short years ago (our first workshop was actually a refurbished chicken shed!), Christopher Ward has won a worldwide following for his eponymous watch brand and can justifiably claim to manufacture the most affordable luxury watches in the world.

For many, the philosophy behind the brand, trying to put luxury watches within the reach of everyone, is as attractive as the watches themselves as is the very open approach of the business which means that Chris and the team spend a lot of time communicating personally with our customers - many of whom have become friends.

As the owner of a Christopher Ward watch, if ever you need to get hold of us we are at your service. We have listed some useful contact details on the back cover.

There is also always something new going on at our website at **www.christopherward.co.uk** and, if you haven't already discovered the independent forum dedicated to our brand at **www.christopherwardforum.com** we would recommend a visit. Informative and fun, it's a great place to hear the unexpurgated view of Christopher Ward of London!
